

November 25<sup>th</sup>, 2009

To: The Honourable Members of the Senate Standing Committee for Social Affairs

Dear Senators,

I write to you as a private Canadian citizen, as a Ph.D. clinical and forensic psychologist, and as a member of the National Executive of the Canadian Action Party and Chair for Aboriginal Affairs. I write also as a father of five Canadian citizens, two of whom are in the Canadian military, and one scheduled to be deployed to the criminal war being perpetrated in Afghanistan—in service of those same people who are now bringing us Bill C6.

Like a growing number of Canadians, I have woken up to the criminality of what is being done by our elected government representatives in service of the shadow government and the corporate/financial elite within Canada. It is now known world wide that the September 11, 2001 attacks on New York City and the Pentagon, were not committed by radical Muslims and Arabs, but that instead it involves the same cabals of elites who fashion this new world order for us and who have managed to gain effective control of the Canadian government.

Paul Hellyer, esteemed former Canadian Defence Minister and founder of CAP, in his book *Goodbye Canada* (2001), explained that the secretive Council of Foreign Relations, the Trilateral Commission and the Bilderberg group all conceive of such a 'new world order,' which Hellyer described as the *New World (Dis)order*, and which passes today under the euphemism of 'global governance.' Global government by criminal psychopaths, international banksters and Zionist cabals—the scum that rose to the top of the waters of life. These secretive groups have acquired effective control of the Canadian government and have completely deceived the Canadian public through their use of the corporate media as a propaganda and mind control technology. The media all deserve David Rockefeller buttons for their deception of the Canadian public concerning all major national and international affairs over the past fifty years or longer. Maybe Senators who support this Bill C6 might similarly receive their David

Rockefeller buttons also for helping to fashion a totalitarian state within Canada, and helping with the genocide agenda being perpetrated here as elsewhere. Perhaps Senators might pose as a group for pictures to be taken together under our local black widow spider with the Houses of Parliament behind, or would they prefer a group photo in front of the Masonic Lodge across the street?

Canada is no longer a democratic country with a government representing the interests of the common citizens and the media has played a pivotal role in deceiving the Canadian public over many decades. Canadian citizens are being sprayed coast to coast by high atmosphere chemtrails; while bio-weapon and inoculation programs spread disease throughout the nations of the world; the foods are increasingly poisoned and genetically modified, as well as the land, air and water. Canadian citizens are currently under attack through the '*biological terrorism*' that these people represent. Canadian military and police personnel, like the Canadian government, are guilty of treason and corrupted at the highest levels by these same criminal networks and make no real effort to arrest the true terrorists of modern times.

I urge you as Senators, to not sell your souls for passage into this new world order nightmare that is being incrementally fashioned around the world and here within Canada. Bill C6 has to be apprehended in terms of its relationship to the whole new world psychiatric disorder agenda being incrementally fashioned within this country. We need to arrest the real terrorists in our society and seize their assets under existing anti-terrorist legislation. You all know in your hearts that this Bill C6 is based on lies and is a further step into the world of fascism and the suppression of human freedom and moral integrity. Say no to this Bill and to the whole psychopathic agenda that is being advanced in our once great country of Canada.

Yours respectfully,

Christopher P. Holmes, Ph.D.
